

## **Community Support Services Behavior Support Services**

This service provides assistance in the area of positive behavior supports across the life span of individuals being served by the Butler County MRDD Program. We are focused on developing behavioral supports for our staff and families, as well as for staff employed by other community agencies.

We closely work with the Butler County Mental Health system to provide positive behavior supports to individuals with dual diagnoses (mental illness and MRDD).

The Behavior Supports Office develops behavior programming that is consistent with the ODMRDD rules and regulations about behavior supports. Our primary goal is to meet the health and safety needs of individuals we serve across all MRDD programming (childhood through adulthood).

**Classroom Consultants** and **Family Focus** are part of the Behavior Support Services office. Family Focus offers in-home consultation and training (much of it about positive behavior supports) to families that request it. Classroom Consultants support students in local school districts by working with teachers on curriculum, classroom management, and behavioral issues.
